Vol. 17 No. 1 January–February 1995

GENERAL ARTICLES

Gender and teacher development: issues of power and culture
Sharon M. Haggerty 1

Collaboration between industry, higher education and school systems in teacher professional development
Ian Ball, Rosemary Jones, Karen Pomeranz and David Symington 17

RESEARCH REPORTS

Science laboratory skills among grade 9 students in Western Australia
Rodney L. Doran, Barry J. Fraser, Geoffrey J. Giddings and Linda DeTure 27

Cultural influences in science education
Eva Krugly-Smolska 45

Reflections on a fifth-grade life science lesson: making sense of children's understanding of scientific models
Sandra K. Abell and Marie Roth 59

Design of a computer-augmented curriculum for mechanics
S. Hennessy, D. Twigger, R. Driver, T. O'Shea, C. E. O'Malley, M. Byard, S. Draper, R. Hartley, R. Mohamed and E. Scanlon 75

Preservice teachers' meaning-making in science instruction: a case study in Manitoba
Jazlin V. Ebenezer and Adell Hay 93

Students' alternative frameworks: towards a linguistic and cultural interpretation
Patrick P. Lynch and Brian L. Jones 107

Preservice teachers' meanings of learning
Jose M. Aguirre and Sharon M. Haggerty 119

BOOK REVIEWS

Research in Physics Learning: Theoretical and Empirical Studies
R. Duit, F. Goldberg and H. Niedderer (eds)
Reviewed by Mike Watts 133

Taking into Account Students' Thinking. A Teacher Development Guide
B. Bell
Reviewed by Mike Watts 134

Women and Science: The Snark Syndrome
Eileen M. Byrne
Reviewed by Carolyn J. Boulter 135

Vol. 17 No. 2 March–April 1995

GENERAL ARTICLES

The place of investigations in practical work in the UK National Curriculum for Science
Sandra Duggan and Richard Gott 137

Access to science learning for children in rural Africa
Alan Peacock 149

RESEARCH REPORTS

Assessing and extending the scope of children's contexts of meaning: context maps as a methodological perspective
Jeffrey W. Bloom 167

A classroom intervention using a computer-augmented curriculum for mechanics
S. Hennessy, D. Twigger, R. Driver, T. O'Shea, C. E. O'Malley, M. Byard, S. Draper, R. Hartley, R. Mohamed and E. Scanlon 189

Conceptual change and environmental cognition
M. Gorodetsky and S. Keiny 207

Filling a curriculum gap in chemistry
A. H. Johnstone and F. F. Al-Naeme 219

A study of the effectiveness of a guided open-ended approach to physics experiments
S. G. Gangoli and C. Gurumurthy 233

Designing tools to develop the conception of learners
Jack Guichard 243

How novice physics students deal with explanations
Jerold S. Touger, Robert J. Dufresne, William J. Gerace, Pamela T. Hardiman and Jose P. Mestre 255

Vol. 17 No. 3 May–June 1995

GENERAL ARTICLES

Science teachers' philosophical assumptions: how well do we understand them?
Vasilios Koulaidis and Jon Ogborn 273

Conceptions of science and technology clarified: improving the teaching of science
R. F. Price and R. T. Cross 285

RESEARCH REPORTS

A study of science-in-the-making as students generate an analogy for electricity
Mark Cosgrove 295

Cognitive effects of science experiments focusing on students' preconceptions of force: a comparison of demonstrations and small-group practicals
Gerard D. Thijs and Gerard M. Bosch 311

The importance of conceptually focused teacher–child interaction in early childhood science learning
Marilyn Fleer 325

Relationships between student performance on conceptual and computational problems of chemical equilibrium
Mansoor Niaz 343

Student teachers' confidence to teach science: is more science knowledge necessary to improve self-confidence?
Ken Appleton 357

Mechanics background influences students' conceptions in electromagnetism
Igal Galili 371

The effect of language on the performance of second-language students in science examinations
Elizabeth Bird and Geoff Welford 389

'Talking your way out of it', 'rigging' and 'conjuring': what science teachers do when practicals go wrong
Mick Nott and Robin Smith 399

Vol. 17 No. 4 July–August 1995

Special Issue: Policy and Science Education
Edited by Peter J. Fenshan

INTRODUCTION

Editorial. Policy and science education
Peter Fensham 411

REVOLUTIONARY POLICIES

The ecology of science education: Brazil 1950–90
Myriam Krasilchik 413

The development of a new science curriculum for secondary school in Spain: opportunities for change
Maria Pilar Jiménez-Aleixandre and Neus Sanmartí Puig 425

Some policy, process and implementation issues facing science education and training in post-apartheid South Africa
Michael Kahn 441

ACCOUNTABILITY AND ACCESS

Curriculum and assessment in science education: the policy interface
Paul Black 453

Central policy and teacher response? Scientific investigation in the national curriculum of England and Wales
Edgar W. Jenkins 471

Reflections on the implementation of National Curriculum Science Policy for the 5–14 age range: findings and interpretations from a national evaluation study in England
Terry Russell, Anne Qualter and Linda McGuigan 481

ACADEMIC LICENCE AND CONSTRAINT

Junior high school science transformed: analysing a science curriculum policy change
Douglas A. Roberts 493

The influence of academic scientists and technologists on Alberta's secondary science curriculum policy and programme
Raja Panwar and John Hoddinott 505

LEVELS OF INTENTION

Educational reforms in Norway: improving the status of school science?
Svein Sjøberg and Doris Jorde 519

The sharing of meaning between educational policy and science education in practice
Peter J. Fensham 531

SCIENCE, GENDER AND SCIENCE EDUCATION

Agents for change: policy and practice towards a more gender-inclusive science education
Jan Harding and Lesley H. Parker 537

Vol. 17 No. 5 September–October 1995

GENERAL ARTICLES

When is a policy not a policy? School-based assessment of practical science at 16+
E. W. Jenkins 555

On the identification of principles in science that might inform research into students' beliefs about natural phenomena
Martin Monk 565

RESEARCH REPORTS

First-year chemistry practicals at universities in England and Wales: aims and the scientific level of the experiments
Marthie A. M. Meester and Roger Maskill 575

Elementary preservice teachers: constructing conceptions about learning science, teaching science and the nature of science
Brenda J. Gustafson and Patricia M. Rowell 589

The preparation and support science students' teaching practice: students', teachers' and tutors' perceptions of what is required
Roger Maskill and Sandra Escovedo Selles 607

Models in physics: perceptions held by final-year prospective physical science teachers studying at South African universities
J. J. A. Smit and M. Finegold 621

Children's knowledge of the earth's shape and its gravitational field
Paul Arnold, Ann Sarge and Lisa Worrall 635

The ontology of physical events: a comparison of two groups
M. C. Mariani and Jon Ogborn 643

The location of alternative conceptions by a concept graph technique
J. K. Mohapatra and B. K. Parida 663

Vol. 17 No. 6 November–December 1995

GENERAL ARTICLES

How to infuse actual scientific research practices into science classroom instruction
Eleanor Abrams and James H. Wandersee 683

The effect of culture on the learning of science in non-western countries: the results of an integrated research review
David Baker and Peter C. S. Taylor 695

RESEARCH REPORTS

First-year chemistry practicals at universities in England and Wales: organizational and teaching aspects
Marthie A. M. Meester and Roger Maskill 705

Children's ideas about ecology 1: theoretical background, design and methodology
John Leach, Rosalind Driver, Philip Scott and Colin Wood-Robinson 721

Applying the concept of conjugation to the Brønsted theory of acid–base reactions by senior high school students from Germany
Hans-Jürgen Schmidt 733

Learning from group work in science
R. F. Kempa and Aminah Ayob 743

Three approaches to measuring children's perceptions about technology
Léonie J. Rennie and Tina Jarvis 755

High school students' concepts regarding food chains and food webs: a multinational study
Charles R. Barman, Alan K. Griffiths and Peter A. O. Okebukola 775

Analogies in chemistry textbooks
Rodney B. Thiele and David F. Treagust 783

Chemically speaking: a description of student–teacher talk during chemistry lessons using and building on students' experiences
Susan Rodrigues and Beverley Bell 797
